PALCO A - CBPM
SETUR BA

PANEL 1 - THE CURRENT STATE OF MINING IN BRAZIL

Summary: The mining and metals industry is undergoing a transformation to take on a strategic role in the clean, decarbonized economy of the future. Mining as part of development, integrated with other industries such as energy - electrification, agriculture, food production. What is needed for this qualitative leap?

Ana Maria Ferreira da Cunha - Founder of the Prestas na Mina movement | Director of Corporate Affairs and Sustainability at Anglo American | ESG Coordinator for Mining at IBRAM

Diretora de Assuntos Corporativos e Sustentabilidade da Anglo American Brasil, Conselheira do IBRAM e Coordenadora do ESG da Mineração do IBRAM

Painelista

Anderson Baranov - CEO of Norsk Hydro Brasil

Atualmente, é CEO da Norsk Hydro Brasil, viabilizando conexões e projetos para as operações da empresa no país.

Painelista

Anderson Dourado Rodrigues da Silva - Advisor of the Director - Geological Survey of Brazil

Pesquisador em Geociências no Serviço Geológico do Brasil (SGB) desde 2014, graduado em Geologia pela Universidade de Brasília (2011) e mestre em Geociências pela Universidade de São Paulo (2019). Possui experiência em exploração mineral, com foco em depósitos de metais básicos. No SGB, atuou em projetos de Geologia Econômica. Atualmente é assessor da Diretoria de Geologia e Recursos Minerais.

PANEL 8 - INFRASTRUCTURE AND LOGISTICS

Summary: The Amazon is notable for the lack or even non-existence of essential items for communication, mobility, development and quality of life. There needs to be quality internet, decentralized renewable energy, intelligent use of rivers, road mobility, information systems and basic sanitation, so that the region can connect and integrate, which are indispensable for economic and social development. Panel 8 will focus on the demands for infrastructure and logistics, the difficulties in making them viable, and how to place them in a larger context: the design of a long-term development model for the Amazon, taking into account regional peculiarities and the broad debate between the various players involved.

Davi Barreto - CEO of the National Association of Rail Transporters - ANTF

Graduado em engenharia eletrônica pelo Instituto Tecnológico de Aeronáutica (ITA) e mestre em economia pela Universidade de Brasília (UNB), com forte experiência no setor público, atualmente é Diretor-Presidente da Associação Nacional dos Transportadores Ferroviários (ANTF).

PANEL 10 - NEW ECONOMIES AND THE FUTURE WE WANT

Summary: The times we are living in pose the challenge of learning to deal with an ever-increasing and more dynamic complexity for which it is important to be able to rely on a variety of "economies". This new economic paradigm is redefining the form of production and consumption, with an emphasis on technology, innovation, flexibility, sustainability, collaboration and sharing. Is it possible to reconcile the "traditional economy" with the "new economies"? What do we need to do to make progress in the new economies? The purpose of Panel 10 is to discuss and present ways of working towards this new form of coexistence.

PANEL 11 - EFFICIENT USE OF NATURAL RESOURCES AND THE CLIMATE AGENDA

Summary: The scarcity of natural resources is one of the most pressing challenges of the 21st century. In a world where the global population exceeds 8 billion, the demand for resources such as water, energy and minerals is growing exponentially. Thus, the combination of population growth, economic development and climate change is putting unprecedented pressure on the planet's natural resources. In this Panel we will explore the causes and dimensions of this crisis, its challenges and strategies for dealing with it.

14:00

PALCO D - HYDRO

PANEL 12 - EDUCATION, CULTURE AND COMMUNICATION

Summary: In order to implement a development agenda, it is essential to take care of people and give due importance to social development. Dealing with issues of inequality and poverty, for example, implies generating basic conditions of quality of life in the different dimensions of sanitation, housing, culture, education, health and communication for the Amazonian population. Panel 12 is precisely in line with the social agenda, discussing issues such as education, culture and communication and the challenges they present.

DIALOGUES: THE CHALLENGES OF ILLEGAL MINING IN THE AMAZON

Summary: The advance of illegal mining into the forest, indigenous territories and environmentally protected areas is a priority issue in Brazil. In the Amazon, illegal small scale gold mining is already taking place on an industrial scale and has left a trail of destruction of biodiversity and violation of the lives and rights of indigenous populations. After control measures were adopted in 2023, the Brazilian gold market went into shock, with significant falls in the production and export of the metal. Important steps to control the gold trade have been taken, with significant effects on the market. Others, however, are still needed to complete the journey to the effective transformation of the sector. To this end, combating illegal gold mining must be a priority, because it causes severe environmental and social impacts, as well as establishing unfair competition in the market. It is also essential to improve the rules governing small scale gold mining operations, so that they adhere to reality. The Amazon and New Economies International Conference Dialogues aim to discuss the issue of illegal small-scale gold mining, its impacts, the related regulatory and legal issues, as well as pointing out the necessary command and control measures and strategies to regulate the activity.

Larissa Rodrigues - Research Director at Instituto Escolhas

Moderador(a)

General de Exército Luiz Gonzaga Viana Filho - Military Commander of the Amazon

Comandante da 22ª Brigada de Infantaria de Selva, em Macapá/AP, Comandante da 11ª Região Militar, em Brasília/DF Chefe do Centro de Inteligência do Exército (CIE), Comandante da 2ª Divisão de Exército (2ª DE), Comandante Logístico do Hospital das Forças Armadas (HFA). Assumiu o Comando Militar da Amazônia em 19 Ago 2025.

Painelista

Gilson Gomes Camboim - National Coordinator of Mineral Cooperativism at OCB & President of the Federation of Mining Cooperatives of the State of Mato Grosso - FECOMIN

Bacharel em Administração de Empresas, possui pós graduação em Gestão Cooperativa, Planejamento Tributário e Direito da Mineração e com ampla experiência em Mineração Artesanal e de Pequena Escala há mais de 20 anos. Atua no cooperativismo mineral desde 2009, exerce a função de Conselheiro Estadual do Cooperativismo Mineral na OCB/MT e tem a função Coordenador Nacional de Cooperativismo Mineral.

PALCO B - VALE

DIALOGUES: THE CHALLENGES OF INVESTMENTS IN INFRASTRUCTURE AND LOGISTICS IN THE AMAZON AND THE SUSTAINABILITY OF THE TERRITORY.

Summary: The Amazon is the main frontier for major infrastructure investment projects in Brazil over the next few years. Among the initiatives planned are a set of logistics integration projects between land and water transportation, which aim to connect the production of the North and Central-West regions with the ports of the Amazon basin. The installation of infrastructure services to provide local water, sanitation, health, mobility and energy has an immense capacity to attract capital to the region's economy and generate benefits for the population. However, in order to produce the desired results, it is essential that the implementation of infrastructure in the Amazon takes into account the heterogeneity and complexity of the region, promoting development based on the social, economic and environmental peculiarities of each territory. Discussing the relationship between infrastructure X planning X sustainability is the aim of this Dialogue, as well as pointing out possible ways forward.

Beto Verissimo - Co-founder at Imazon; Director at Centro de Empreendedorismo da Amazonia; Director at Amazonia 2030 initiative; Director of Brazil's Social Progress & Special Forest Envoy at COP30 - Imazon | IPS

DIALOGUES: TERRITORIALITY, SUSTAINABILITY AND HUMAN RIGHTS

Summary: Native and traditional peoples and communities play a crucial role in Brazil, both in environmental preservation and in maintaining cultural diversity. They have a deep knowledge of local ecosystems and sustainable practices that contribute to the conservation of biodiversity and the protection of territories. In addition, the preservation of their cultures and traditions enriches the country's cultural heritage. It is important to have this space to address initiatives and strategies aimed at valuing and recognizing indigenous and traditional peoples and communities and how they are essential for environmental protection, the maintenance of cultural diversity and sustainable development in Brazil. And also to talk about the challenges and threats they face in their valorization.

Lissette Hidalgo Bacián - President, Quechua Indigenous Community of Quipisca - Chile

Engenheira de Gestão de Recursos Humanos com mais de uma década de experiência em engajamento social e comunitário, ela demonstrou forte liderança ao longo de sua carreira em iniciativas que promovem a revitalização cultural, a valorização da herança indígena e o desenvolvimento sustentável. Como presidente de sua comunidade, liderou com sucesso projetos que visam fortalecer a identidade cultural.
